SUMMARY

Results-driven Frontend Developer with expertise in JavaScript, ReactJS. Proficient in creating responsive web pages, delivering impactful projects, and building interactive dashboards. Skilled in collaborating with cross-functional teams to achieve project objectives and optimize user experiences. Seeking opportunities to leverage and advance web development skills in a dynamic and innovative environment. Also add I have knowledge of SDLC and Agile methodology.

EXPERIENCE

Web developer Intern | Prodigy InfoTech, Remote | Aug '23 to Sep '23

- Implemented a project centered on HTML, CSS, and React, integrating APIs to enhance functionality.
- Created a Crypto tracker application, demonstrating expertise in frontend development.
- Leveraged API integration to augment the application's functionality and user experience effectively.

PROJECTS

Code Deck

- Developed a **Online IDE** allowing users to create multiple code snippets and execute them using an online compiler (Judge0).
- Implementing a Code Editor Frontend with **ReactJS** (using the **CodeMirror** package) and integrating **Rapid API** to establish connectivity with **Judge0**. This setup facilitated seamless code execution and result retrieval.
- Extensive functionality was added, including **multi-language support** (cpp, python, java, javascript), **multi-theme support**, features for **uploading and downloading code**, an input and output console (for file input and output downloading), functionality to save multiple playgrounds locally, and **Fullscreen Support** for an enhanced coding experience.

CoinChaser

- Created a Cryptotracker application with the **CoinGecko API**, offering real-time cryptocurrency data across different time frames. Users can make informed decisions based on market trends.
- Enhanced security with **Firebase login** and sign-up features, ensuring a seamless user experience. Integrated a **cart function** for managing cryptocurrencies, streamlining portfolio management.
- Utilized **ChatJS** and **Material UI** libraries to design a visually appealing interface, providing a modern and intuitive user experience. The application simplifies navigation, investment tracking, and user engagement effortlessly.

Tasty Treat

- Developed a state-of-the-art pizza delivery application using **React JS, HTML, and CSS**, focusing on enhancing every aspect of the customer journey
- Integrated **Razorpay** for secure transactions and utilized **EmailJs** for streamlined communication, prompt updates, and feedback collection.
- Crafted an intuitive interface with visually pleasing design elements and a feature-rich **cart system** for seamless order customization. Ensured a delightful user experience from start to finish.

SKILLS

- Languages: HTML, CSS, JavaScript, ReactJS, Java
- Databases: MySQL, Firebase
- Technologies: Git

EDUCATION

Bachelor of Technology (Computer Science) | NIET College, Delhi NCR, IN

August 2020 - Present | Current CGPA: 7.7

Intermediate | Shri Ramlala Inter College, Kanpur, Uttar Pradesh, IN

2017 to 2018 | Percentage: 82.2
